Dear Patriots, please get this message to President Trump. (Prepared by Friends of Leader Technologies.) Ver. 9/20/2018

AN IMMEDIATE ALTERNATIVE TO THE MAINSTREAM MEDIA (MSM)

Leader Technologies, Inc. was founded in Columbus, Ohio in 1997 by engineer-entrepreneur-musician-management consultant Michael T. McKibben. He has several hundred shareholders who backed him with \$20 million in research and development capital. Before starting Leader, Mr. McKibben had rebuilt AT&T AccessPlus 3.0 Windows 95 email system in the mid-1990's, established one of AT&T WorldNet's first ten commercial websites, then he set out to solve Internet collaboration problems, and invented what we now call **social networking**.

To cut a very long story short, Mr. McKibben went to Washington, D.C. (in early 2000) to find an intellectual property attorney and hired law professor James P. Chandler, III. Chandler also advised Bill and Hillary Clinton, the Judiciary, academia, Congress, corporate intelligence and the U.S. intelligence community. Attorney Chandler *pretended* to help Leader protect its **trade secrets** and prepare for patent filings, while he secretly *stole* Leader's innovations and gave them to his cronies in the Deep State shadow government after forming the IBM Eclipse Foundation (Nov. 29, 2001) with David J. Kappos, IBM's intellectual property counsel and later Obama's patent office director (2009-2013). This timeline is thoroughly documented and available.

In short, all of the social networking companies that emerged in 2004, including Facebook, Google, Twitter, Instagram, YouTube, Yahoo, blogs and wikis all got their start using Leader Technologies' trade secrets. In 2008, despite stonewalling by an Obama judge nominee, Leonard P. Stark, Leader sued Facebook and proved on 11 of 11 claims that Facebook infringes their patents. Leader then encountered the utter corruption of the senior federal courts that circled the wagons around Facebook and failed to disclose their *massive* holdings of personal Facebook financial interests. Hindsight shows that Facebook was merely one of many rogue C.I.A. intelligence psychological operations who, under the cover of The Patriot Act's usurpation of the Bill of Rights, organized to perform mass surveillance and media narrative control, while also making their friends wealthy.

Leader shareholders have recently filed liens, effectively, at the White House called "**Miller Act Notices**" demanding that the Executive Branch pay them for 18 years of free use of their social networking innovations without compensation during the Clinton, Bush and Obama years and right up to this day. They know President Trump had nothing to do with this, but the Miller Act law requires that they serve him as the President.

The total claim in damages and forward-looking licensing is into the trillions of dollars in uncompensated value, but the Miller Act Notice breaks down the proposal into a win-win scenario. Part of this win-win is for the federal government to collect up to **\$500-750 billion in new Internet revenue** without raising taxes.

Michael McKibben said he is willing to dedicate the bulk of his 51% to plowing those funds into the development of a truly **Fourth Estate Free Press** that will be established using these funds—completely free of the corrupt corporate interests that have hijacked our mainstream media.

The Miller Act Notice is teed up so that Mr. Trump can direct the Treasury to write ONE CHECK to Leader Technologies and kick off the immediate establishment of a competitive alternative to the mainstream media's (MSM) stranglehold on America's *rancid* social and political discourse. Mr. Trump has the full, singular authority to make this decision based on the prior Clinton, Bush and Obama executive orders that created this theft.

Bottom line, the establishment of an effective alternative to the MSM is possible with the stroke of a pen. It is teed up and actionable tomorrow by Mr. Trump.

[Epilogue: I support this unique opportunity, Mr. President.]
