5G Interferes with the human brain function

5G Considerably Higher Frequencies than at present

Cell Phones Cause Insomnia

Uninformed public must be informed

The most horrific form of mental brainwashing

What Can you do?

The killing off of humanity

The implementation of 5G continues unabated across the Western World, Japan and China, in spite of zero mandatory health and safety tests having been conducted. This *illegal* roll-out is focusing on the largest urban centres and especially high-profile venues that can be used as an advertisement for how '*splendid*' 5G is – *which it is not*.

Now the Zionist Deep State is on the verge of losing their grip on humanity and has failed to instigate a nuclear World War III, or kill humanity off with bioweapons, it appears they are trying to use 5G technology to complete the job. This secret effort is why UK Prime Minister Theresa May fired Defence Secretary Gavin Williams in early May, “for leaking information that May supported Huawei 5G technology,” which has been confirmed by various intel sources.

5G technology has been promoted by various Governments, specifically that of Theresa May, even though it has been shown to be *extremely harmful*. The most devastating problem is the damage it causes to the [mitochondrial system](#) of the brain. “The leak by the defence minister was aimed at stopping this.” Mr Gavin Williams said.

5G Interferes with the human brain function

Frequent readers know by now that the Rothschild Khazarian central bankers mafia is destroying the financial world and subsequently aiming to kill 90% of humanity in order to stay in power. The world’s military and intelligence communities are well aware of the Deep State cabal’s well-documented attempts to kill us through nuclear war, bioweapons, and now Directed Energy Weapons, disguised as “5G.”

This technology is already active in many homes and it seriously [interferes with human brain function, skin and eyes](#). These shocking findings were made public via Israeli research studies. Understand, you are volunteering your living body in a giant uncontrolled experiment on the human population. At this moment, residents of various regions – like those of California, Washington DC, and over one hundred Chinese cities, are living within a vast [experimental millimetre wave-length network](#), of which they are not aware nor have they given permission thereto.

Tech giants like Apple, Microsoft, Google and Facebook are all part of this sinister plan, which is exactly why every one of them are working closely with China (Huawei) to roll out this authoritarian techno-tyranny infrastructure system, with the plan to enslave every citizen of the world, making them *powerless and obedient* to a globalist technocracy that runs the “one world government.”

All this serves as even more of a reason to remove the cabal’s control of their main financial source of power, namely, the privately-owned central banks, [all over the world](#).

For now, mobile phones, smartphones, tablets, most Wi Fi-routers operate at under 3 GHz in what is called the “microwave” region of the electromagnetic spectrum. With wavelengths of about 16 cm long. A smartphone operating at 800 MHz, sends and receives signals with wavelengths of 37.5 cm. Operating at 1.9 GHz, the wavelengths are 16 centimetres. Wi Fi uses the 2.4 GHz frequency band with 12 centimetre wavelengths.

5G Employs Considerably Higher Frequencies

The introduction of 5G requires the use of considerably higher frequencies, above 30 GHz wavelengths and these are mere *millimetres*, rather than centimetres long. The millimetre waveband from 30 GHz to 300 GHz is referred to as an Extremely High Frequency, and its wavelengths are between 10 millimetres and 1 millimetre in length. The *higher* the frequency, the *shorter* the wavelength will be. Until today, extremely High Frequency electromagnetic radiation has not seen widespread use, and its introduction marks a significant change in the kind of electromagnetic energy that will be present in our environment.

5G is far more lethal than its three predecessors, as it shortens the *resonance spaces* substantially into millimetre pulses and raises the output by a factor of at least one hundred; standing within the range can be compared to being enclosed in an activated microwave oven.

The 5G waves are of *ultra-high frequency* and *intensity*, being easily absorbed by lifeforms such as your body and trees, but also buildings. Although Cell Towers will be smaller, they must be positioned much closer together for 5G to be effective.

At present Planet Earth is already comprehensively irradiated from outer space. There are approximately two thousand fully functioning satellites orbiting the Earth. Some beam down commercial GPS-signals, some provide TV reception, others provide mobile phone services, and various bounce radar back and forth to produce images for meteorologists and military surveillance.

But the approximately 20,000 new satellites will [constitute a massive increase](#) in the number of satellites in the skies above us, and a correspondingly massive increase in the radiation penetrating the Earth. All purportedly serving the same purpose of providing global broadband services. The satellites will operate at a height of approximately 210 miles, and irradiate the Earth with extremely high frequencies between [37.5 GHz and 42 GHz](#). Other companies, such as Boeing, One Web and Spire Global are each also launching their own smaller satellite fleets, increasing the total number of projected new broadband satellites substantially, resulting in much higher irradiation of our planet.

All this extra EM smog will interfere dramatically with the day to day function of human beings. For instance, all our thoughts, sensations and actions arise from bioelectricity, generated by neurones and transmitted through complex neural circuits inside our skull. Electrical signals between neurones generate electric fields that radiate out of brain tissue as electrical waves that can be [picked up](#) by electrodes touching a person’s scalp.

Cell Phones Cause Insomnia

The brain is an [electrochemical organ](#); researchers have speculated that a fully functioning brain can generate as much as 10 watts of electrical power. Measurements of such brainwaves in EEGs, provide powerful insight into brain function and is a valuable diagnostic tool for doctors. As a matter of fact, brainwaves are fundamental to the internal workings of the mind. Cell phone signals alter a person's behaviour during the call, the effects of the disrupted brain-wave patterns continue long after the phone is switched off.

Researchers have monitored a person's brainwaves by EEG while their cell phone was switched on and off by remote computer, and also switched between "standby," "listen" and "talk" modes of operation for 30 minute intervals on different nights.

The experiment revealed that after the phone was switched to "talk" mode, a different brain-wave pattern, called delta waves, in the range of one to four Hertz, remained dampened for nearly one hour after the phone was shut off. Although the test subjects had been sleep-deprived the night before, they could not fall asleep for nearly one hour after the phone had been operating without their knowledge.

Uninformed public must be informed

It's certain that these 5G super-antennas will become silent killers as an extension of the NAZI genocide in WW2. All of these steps are being taken by purposeful design.

The uninformed public, must be made aware of the location of each and every 5G killer pole in their country and region and they must be informed well in advance. Not to do so would be similar to the Nazi experiments performed on humans during World War II, where many died slowly and painfully.

For anyone who doubts the sheer intensity of the unsafe and even lethal energies associated with the activated 5G energy grid, please [view this video](#). This video – 1 hour 17 min. should be shared to target local bureaucrats, technocrats, health practitioners, local and federal government agencies and more than anything else, your family and friends. In this video, various conscious professional experts share their concern and knowledge related to weapons development, biology, molecular and cellular natural science, blood microscopy, as well as the insights of respectable, honest leaders. ***This technology was conceived and implemented with the intention to destroy humanity and planet Earth.***

The most horrific form of mental brainwashing

Brainwaves change with a healthy person's conscious and unconscious mental activity and state of arousal. But [scientists](#) can do more with brainwaves than just listen in on the brain at work. They can selectively control brain function through [transcranial magnetic stimulation](#) (TMS). This technique uses powerful pulses of electromagnetic radiation, beamed into a person's brain to jam or excite particular brain circuits. ***It is the most horrendous form of mental brainwashing so far known.*** Although a cell phone is less powerful than TMS, the question still remains: Could the electrical signals coming from a phone affect certain brainwaves operating in resonance with cell phone transmission frequencies? After all, the caller's cerebral cortex is just centimetres away from the radiation broadcast of the phone's antenna. Two studies provide some revealing findings, first that cell phone use is responsible for observed harmful effects. And secondly, that these brainwaves reflect a person's state of arousal and attention. Researchers monitored the brainwaves of 120 healthy men and women while a popular smart phone, was strapped to their head. A computer controlled the phone's transmissions in a double-blind experimental design. In other words, neither the test subject, nor researchers knew whether the cell phone was transmitting or idle while EEG data was being collected. The data showed that when the cell phone was transmitting, the power of a characteristic brain-wave pattern called [alpha waves](#) in the person's brain was

boosted significantly. The increased alpha wave activity was greatest in brain tissue directly under the cell phone, strengthening the case that the phone was [responsible for the observed effect](#).

Be aware; Our brain supports virtually every aspect of our thinking, personality, identity, and sleep.

It's highly essential that everyone aggressively opposes the 5G roll-out wherever they live. Anyone who understands the profound, while at 4G levels, often subtle harm to bio-organisms inflicted by microwave radiation, understands that each 5G microwave tower by itself constitutes a **dangerous risk for humanity and in fact, all life on earth**. This is especially the case when supplemented by the significantly higher electromagnetic frequency ranges that are utilised in the 5th generation of digital cellular networks. It's evident that wherever the transmitting equipment is erected, this indicates the presence of your Silent Assassin!

What Can you do?

First unite with the people in your neighbourhood or community, to protest against any roll-out of 5G. Already many communities across the globe are rising up in protest — [profound protests — to shut 5G down](#). Many are organising locally and nationally to confront the collusive *law-breaking* by government and corporations in their conduct pertaining to the roll-out of 5G. There is a likelihood that this patently unlawful deployment of 5G will be stopped dead in its tracks, if people really highlight the health dangers as described in this article. You should never use wireless 5G technology. Rather install a wired connection for your internet, which is faster than wireless anyway. These precautions are even necessary for 4G, unplug all the devices that beam out these electromagnetic waves at night. And start explaining the dangers to your neighbours, requesting them to do the same. Be extra alert to preserve your health and maintain a healthy, organic food regime if possible, to keep your immune system in tip top condition. Explore what's becoming known as [the mind-body connection](#), regarding how powerful consciousness is. To summarise, the current global, Zionist Deep State regime, controlled by Khazarian Satan-worshiping central bankers, are systematically destroying the natural world and aim to kill off 90% of humanity in order to stay in power. Share this article with everyone you know, it concerns their health and that of their loved ones. It also shows the importance of ending all Rothschild-owned Central Banks, by cutting off their funds. 5G is Directed Energy Weaponry, disguised as technological progress, directed at we the people, anywhere and everywhere on the globe.

Let's all work together to terminate 5G, before it terminates US. (Reader Observation)

Demonstrating how ferocious the Deep State cabal is in their ploy to kill us, below a recent Comment from my [article Agenda 21, converted into 2030](#): by reader: Teemaree. "I can tell you, here in Australia, things are in full swing headed towards agenda 2030. People are playing right into the hands of the agenda. The huge push on vaccinations, the huge amount of people dying from cancer. School kids brainwashed, and taking time off school to protest climate change. All is being manipulated, changes in weather patterns through chemtrails to get farmers off their land, so their farms can be bought, giving the rich and governments control over all food and water. Abortions being allowed after a child is born. My question here is, what is to stop them from killing a child? If we have got to the point of killing new born babies? A famous sports star here, who is also a minister, posted at Easter for homosexuals, liars, alcoholics to repent or they will go to hell. He was taken to court, lost his playing contract of millions of dollars for his religious beliefs. Muslim refugees are being pushed onto us, that we are appeasing. Small units are going up everywhere, all of a sudden... the government wanting to change over to electric cars, limiting and controlling travel. They will then charge over 100 dollars for a small car tank of petrol. Waterways in the country areas are being contaminated and killing the fish and other life in the rivers... wanting to pay for gender reassignment, feminising males so they won't fight against the new order... it's all happening, I just pray I'm not here when it all eventuates."
